ADDITIONAL

- English C1/C2
- Driving Licence B
- Homelab: K8s, Docker, Net.
- Continuous learner

Miloslav Štefan

DevOps / Operations Engineer

Professional Summary

Operations-focused DevOps Engineer with a strong Linux and networking background. Hands-on experience managing Kubernetes clusters, CI/CD pipelines, and production systems. Focused on reliability, monitoring, automation, and incident resolution with a troubleshooting mindset spanning from L1 networking to modern cloud-native stacks.

- Kubernetes
- Docker
- GitLab CI/CD
- ELK Stack
- Grafana
- Ansible
- Linux
- Proxmox
- Juniper
- Cisco
- Bash
- Python

Professional Experience

DevOps Operation Specialist @ T-Mobile 2023 – Present

- Operate and maintain Kubernetes clusters in production; manage deployments and cluster health.
- Build and manage CI/CD pipelines using GitLab; automate deployment workflows.
- Monitor systems via ELK stack (Grafana, Kibana); troubleshoot incidents, ensure service reliability.
- Automate operational tasks using Bash; strong focus on stability and fast incident response.

Linux System Administrator L2 @ Apollo Games 2021 – 2023

- Managed large-scale Linux infrastructure and VM clusters (Proxmox, Ceph).
- Automated upgrades and config management via Ansible; monitoring, alerting, incident resolution.
- Datacenter operations: racks, cabling, storage, backups, SQL basics and GitLab workflows.

Network Engineer @ Comsource 2020 – 2021

- Configured and troubleshot Juniper (EX, MX, SRX) and Cisco devices; VLANs, routing, VPNs.
- Resolved network incidents, mitigated DDoS attacks, deployed new infrastructure via CLI.

Service Desk → **Network Operations** @ NTT / Dimension Data 2017 – 2020

- Started as Service Desk; progressed to Network Operations handling WAN/LAN/firewall issues.
- SLA-based incident handling; developed strong troubleshooting and escalation skills.

Remote IT Support @ DXC Technology 2016 – 2017

- Enterprise user support: systems, VPN, Citrix, email protocols, Active Directory.

Internal IT Administrator @ Karumien 2015 – 2016

- Supported internal infrastructure and end users.
